AFFORDABLE, INTUITIVE PROCESSING AND DOCUMENT REVIEW FOR CORPORATE LEGAL TEAMS

Digital Discovery Pro® is an intuitive cloud-native data processing and document review application that empowers corporate legal teams to reduce ediscovery expenses, risk, and timelines while generating faster, better outcomes for the business.

Processing and Culling

Dramatically reduce ediscovery expenses and timelines by processing and culling data in house before outsourcing to service providers for review.

Early Case Assessment

Empower your team to conduct ECAs in house to reduce ediscovery expenses and uncover insights that result in faster, better decisions.

Document Review and Production

Conduct quick, defensible, and cost-effective document review for small litigation matters, regulatory investigations, subpoenas, and other third-party data requests.

Internal Investigations

Equip your team with the tools needed to conduct quick, defensible internal investigations while also reducing costs and maintaining control over sensitive matters.

Discovery Repository

Maintain control over your ediscovery data in a secure, accessible repository that reduces overall ediscovery costs and reduces litigation timelines.

★★★★★

"Digital Discovery Pro empowers our legal and compliance teams to do more review in-house, which has cut costs dramatically."
– Director of Ediscovery, Fortune 500 financial services firm

"It used to take us one or two weeks to review all of our documents and tag them as responsive or nonresponsive for each new matter. Now it takes us an average of one to two days."

– Corporate Counsel, Fortune 500 Energy Company

SUBSTANTIALLY REDUCE EDISCOVERY COSTS AND TIMELINES.

Convenient data ingestion options

- Ingest data directly from the Legal Hold Pro® collections module.
- Drag and drop to upload files via a secure web browser.
- Transfer terabytes of data via Amazon Snowball, a secure hardware appliance for moving data into the AWS cloud.

Rapid data processing and indexing

- Process 50+ files types from the popular corporate data sources.
- Index hash values, metadata, and ingestion details for searchability.
- Automatically deNIST and deduplicate files.

Powerful culling and search capabilities

- Get insights into data volumes and file types for review.
- Cull data by date, document type, custodian, domain, and more.
- Use targeted keyword searches to find documents of interest.

Intuitive document review features

- Simplify document review with an intuitive interface that can be learned in minutes.
- See relevant keywords highlighted within documents.
- Toggle to the email threading view to see email conversations.
- Use the "more like this" feature to find related documents.
- Quickly tag documents as responsive, privileged, and more.
- Redact PPI and privileged conversations in seconds.

Flexible productions and exports

- Export in native, TIFF, PDF, and mixed-mode formats.
- Apply Bates stamps and custom endorsements to exports.
- Manage data in a secure online repository, which can be shared with authorized third-parties.

Best-in-class architecture, security, and scalability

- Leverage cloud-native architecture to get up and running in hours.
- Rest assured with our industry-leading security practices and SOC 2® Type 2 certification.
- Enjoy predictable pricing with no maintenance contracts or fees.
- Receive free training and support for the lifetime of your account.
